

EVIDENCE-BACKED DOCTOR VERIFICATION

Sample Doctor Verification Report

This fictional demonstration shows the structure and level of evidence an institution may receive after a HYRDOC verification workflow. It is not a real verification, credential, licence confirmation or employment recommendation.

OVERALL RESULT

VERIFIED

No material discrepancy identified in the approved scope.

QUALITY REVIEWED

DOCTOR Dr. Aadhira Raman Fictional demonstration identity	HYRDOC ID HYD-SAMPLE-000001 Sample identifier only	PACKAGE Professional Verification and monitoring	REPORT DATE 28 Jul 2026 Version 1 - sample
--	---	---	---

Executive summary

The doctor identity, active medical registration, primary medical qualifications and selected previous employment were reviewed using the consented evidence sources shown in this report. One terminology difference in the previous-employment designation was clarified by the institutional responder and was assessed as non-material. The final result reflects the approved scope and evidence available on the stated dates.

Check	Outcome	Primary evidence
Identity	Verified	Government identity document and doctor attestation
Medical registration	Verified	Council register and registration certificate
MBBS qualification	Verified	University / institution confirmation
PG qualification	Verified	University / institution confirmation
Previous employment	Verified with clarification	Authenticated institutional response

Important: “Verified” means that the stated claim was supported by the sources and evidence recorded for that check. It does not confer clinical privileges, employment eligibility or regulatory approval.

01

Identity and medical registration

Doctor-declared information compared with authoritative and documentary sources

LEGAL NAME Dr. Aadhira Raman Matched across consented records	DATE OF BIRTH 15 Jan 1988 Fictional sample date	SPECIALTY General Medicine Doctor-declared	CURRENT CITY Chennai, Tamil Nadu Doctor-declared
--	--	---	---

Identity verification

Government identity document reviewed through secure evidence vault

VERIFIED

DOCTOR CLAIM	SOURCE-CONFIRMED VALUE
Dr. Aadhira Raman; DOB 15 Jan 1988	Name and DOB matched the consented identity document

Conclusion:

The identifying fields used for the approved verification scope were consistent. Full identity numbers are masked in employer-facing reports.

Risk: Low | Evidence: 2 evidence items

Medical registration

Council register review plus doctor-provided registration certificate

VERIFIED

DOCTOR CLAIM	SOURCE-CONFIRMED VALUE
Tamil Nadu Medical Council; SAMPLE-TNMC-123456; Permanent; Active	Registration recorded as active; validity reviewed through 31 Dec 2028

Conclusion:

The registration number, doctor name and status were consistent across the reviewed sources. The council register is a point-in-time source and remains subject to later regulatory change.

Risk: Low | Evidence: 3 evidence items; 1 public-source check

Registration record reviewed

Council	Tamil Nadu Medical Council (fictional demonstration record)
Registration number	SAMPLE-TNMC-123456 - not a real registration number
Registration type	Permanent
Registration date	01 Jun 2015
Current status	Active at the time of sample verification
Valid until	31 Dec 2028
Monitoring rule	Expiry alert plus scheduled registration-status recheck during active annual coverage

Source-quality note

A public register result is recorded with its access date and supporting identifiers. HYRDOC does not treat a name-only match as identity confirmation. Where registry information is incomplete, stale or ambiguous, additional council or institutional confirmation may be required.

02

Medical qualifications

Primary medical and specialist qualifications within the approved scope

Qualification	Doctor claim	Source-confirmed result	Outcome
MBBS	Coastal Medical College, 2011	MBBS awarded by Coastal Health University in 2011	Verified
MD General Medicine	Institute of Clinical Sciences, 2015	MD General Medicine awarded in 2015	Verified
Internship	Coastal Teaching Hospital, 2011-2012	Completion confirmed through institutional record	Verified

Primary medical qualification - MBBS

Official institutional response and degree certificate

VERIFIED

DOCTOR CLAIM	SOURCE-CONFIRMED VALUE
MBBS; Coastal Medical College; Coastal Health University; 2011	MBBS award and passing year confirmed

Conclusion:

The qualification title, awarding university and year were consistent with the doctor claim.

Risk: Low | Evidence: 3 evidence items; 1 source response

Postgraduate qualification - MD General Medicine

Official institutional response and postgraduate certificate

VERIFIED

DOCTOR CLAIM	SOURCE-CONFIRMED VALUE
MD General Medicine; Institute of Clinical Sciences; 2015	MD General Medicine award and year confirmed

Conclusion:

The specialist qualification was confirmed within the approved source scope. This does not independently grant a hospital-specific clinical privilege.

Risk: Low | Evidence: 3 evidence items; 1 source response

Evidence and source handling

Doctor consent	Granted for the specified employer-sponsored verification purpose
Source outreach	Controlled by HYRDOC; the doctor did not send or edit the institutional response
Source authentication	Official-domain and institutional-authority checks completed before findings were approved
Evidence retention	Restricted, audit-logged and retained according to configured policy and lawful purpose

03

Previous employment and source authentication

Institutional response, clarification and outcome governance

Previous employment

Secure institutional response from authorised Human Resources representative

VERIFIED WITH CLARIFICATION

DOCTOR CLAIM	SOURCE-CONFIRMED VALUE
Green Valley Medical Centre; Senior Resident; General Medicine; 01 Jul 2015 to 31 Dec 2017	Employment dates and department confirmed. Institution described the internal title as “Registrar / Senior Resident equivalent.”

Conclusion:

The difference was a terminology clarification rather than a contradiction in seniority, department or service period. The source response was authenticated before the finding was approved.

Risk: Low | Evidence: 4 evidence items; 1 authenticated source response

Institutional source record

Institution	Green Valley Medical Centre - fictional demonstration institution
Responder	Ms. Neha Krishnan, Human Resources Manager - fictional
Response channel	HYRDOC secure institutional response link
Authority declaration	Responder confirmed access to the relevant service record
Authentication classification	Official domain authenticated
Response submitted	24 Jul 2026, 11:42 IST
HYRDOC authentication review	Accepted by assigned Verification Officer

Clarification record

DOCTOR CLAIM	SOURCE RESPONSE	FINAL RESOLUTION
Senior Resident	Registrar / Senior Resident equivalent	Non-material terminology clarification. Service period and department confirmed.

Integrity control illustrated by this sample

A doctor-nominated contact is not automatically accepted as an independent source. HYRDOC reviews the nomination, controls the outreach, preserves the response, authenticates the responder and separates the source statement from the final officer conclusion. Reading or receiving a response alone does not create a verified outcome.

04

Consolidated findings and monitoring

Point-in-time outcomes plus the continuing annual coverage rules

Check	Outcome	Risk	Monitoring / validity
Identity	Verified	Low	Recheck only if a material identity change is reported
Medical registration	Verified	Low	Expiry alert and scheduled status recheck
MBBS qualification	Verified	Low	No routine repeat unless evidence is challenged or amended
PG qualification	Verified	Low	No routine repeat unless evidence is challenged or amended
Previous employment	Verified with clarification	Low	Retained as source-backed historical evidence

Annual monitoring coverage - sample interpretation

The annual plan may maintain credential-expiry alerts, document-renewal reminders, registration-status review where technically available, workflow notifications and an auditable history for the covered employer-doctor relationship. It does not mean unlimited manual re-verification of every qualification or employer throughout the year. New paid-source fees, physical visits, overseas checks or a materially expanded verification scope may require a separate quotation.

Monitoring item	Status	Next action
Medical registration validity	Active	Alert 90 / 60 / 30 days before expiry
Professional document renewal	No current expiry exception	Notify doctor and authorised institution when due
Registration-status recheck	Scheduled	Point-in-time recheck during active coverage
Employer relationship	Future-hire converted to joined	Institution-specific monitoring active

Decision boundary: HYRDOC records evidence and verification outcomes. The employer remains responsible for appointment, clinical privileges, scope of practice, compensation, fitness, references required by policy and all final statutory or regulatory decisions.

05

Consent, quality review and report integrity

Controls that support defensible institutional decision-making

CONSENT Granted Employer-sponsored scope	VERIFICATION OFFICER Completed Source and evidence review	QUALITY REVIEWER Approved Independent second-level review	REPORT VERSION 1 - Current Immutable sample version
---	--	--	--

Workflow governance

Requested by	Sunrise Multispeciality Hospital - fictional demonstration institution
Purpose	Pre-employment doctor verification with monitoring on joining
Consent scope	Identity, registration, primary qualifications and selected previous employment
Officer conclusion	All mandatory checks concluded; one non-material clarification documented
Quality decision	Approved for report generation after evidence and source-authentication review
Report status	Current sample version; not an actual report

Audit and integrity record

Report number	SAMPLE-HYV-2026-0001
Generated at	28 Jul 2026, 16:30 IST
Sample integrity hash	f32882ba1bb683b7edf06524e0f8931c26257e4f542843f53ccbbd159a5d0cee
Retention note	Actual retention is governed by consent, purpose, applicable policy and lawful obligations

SAMPLE - FICTIONAL DATA - NOT VALID

This document is provided only to demonstrate the possible layout and information architecture of a HYRDOC doctor-verification report. The people, institutions, registration numbers, evidence, responses and outcomes are fictional. This document cannot be used for employment, credentialing, clinical privilege, insurance, licensing, regulatory, immigration, legal or financial decisions.

What an institution should evaluate before purchasing

- Which checks are included in the selected plan and which require a separate quotation.
- Which sources can be independently authenticated for the doctor and geography involved.
- Expected turnaround times, source-response dependencies and escalation rules.
- How discrepancies, unable-to-verify outcomes, consent changes and monitoring alerts are handled.
- Which report fields are shared with each authorised role and how evidence access is audited.
